

Roslyn Sanders
Program Coordinator
Santee-Wateree Community Mental Health Center

Santee-Wateree Community Mental Health Center (SWCMHC) nominates Roslyn Sanders for the Louise R. Hassenplug Outstanding Clinician Award. Ms. Sanders is an exemplary clinician, who supervises the SWCMHC Psychosocial Rehabilitative Services (PRS) Program and Individual Placement and Support (IPS) program. In addition, she serves as the Commission on Accreditation of Rehabilitation Facilities (CARF) Coordinator at the Center. The IPS program has consistently received an exemplary rating on its Fidelity rating and the success rate for employment placement is also very high. Her programs have been displaced several times due to building concerns for more than a year, yet they continue to operate successfully and provide excellent patient outcomes.

Ms. Sanders' clinical contributions in Risk Management, Quality Improvement, and CARF policy development are on-point and incisive. She is currently working on developing a Group Therapy component alongside the Peer Support and PRS programming available in Sumter County, and fully understands the need for integrative, coordinated approaches to recovery. She is a valuable member of the Center's Executive Committee and a clinician whose thoughts and recommendations are respected. She can be counted on to understand the bigger picture of management goals without losing the attention and integrity needed to achieve clinical goals and outcomes. Her loyalty and dedication to our mission is her driving force; her clear clinical vision drives her decisions and policy development. Ms. Sanders is a major asset to our team and as her supervisor, I do not doubt her clinical acumen or decisions.
