

# I'M SO STRESSED OUT!

## Is it stress or anxiety?

### Stress

- Generally is a response to an *external* cause, such as taking a big test or arguing with a friend.
- Goes away once the situation is resolved.
- Can be positive or negative. For example, it may inspire you to meet a deadline, or it may cause you to lose sleep.

### Both Stress and Anxiety

Both stress and anxiety can affect your mind and body. You may experience symptoms such as:

- Excessive worry
- Uneasiness
- Tension
- Headaches or body pain
- High blood pressure
- Loss of sleep

### Anxiety

- Generally is *internal*, meaning it's your reaction to stress.
  - Usually involves a persistent feeling of apprehension or dread that doesn't go away, and that interferes with how you live your life.
- Is constant, even if there is no immediate threat.

## Ways to Cope

- Keep a journal.
- Download an app with relaxation exercises.
- Exercise and eat healthy.
- Get regular sleep.
- Avoid excess caffeine.
- Identify and challenge your negative thoughts.
- Reach out to your friends or family.

## Find Help

If you are struggling to cope, or the symptoms of your stress or anxiety begin to interfere with your everyday life, it may be time to talk to a professional. Find more information about getting help on the National Institute of Mental Health website at [www.nimh.nih.gov/findhelp](http://www.nimh.nih.gov/findhelp).
